EXCEPTIONAL PRODUCT. EXCEPTIONAL VALUE.

LS CHEVROLET FORGED LIGHTWEIGHT H-BEAM RODS

Engine Pro LS rods are loaded with features and packed with value. Available only to engine professionals, these rods come with premium ARP bolts and are suitable for applications of up to 1100 horsepower. Our rods are finished in the USA with Sunnen equipment to ensure precise big-end and pin-end bore sizes.

Like all Engine Pro H-Beam rods they have these features:

- CNC machined from one piece SAE 4340 forgings
- Magnafluxed
- Heat Treated
- Stress Relieved
- Shot Peened
- Sonic Tested
- Silicon Bronze Bushed Pin Bores
- ARP Lube Included
- Weight matched within 1 1/2 grams per set
- Bolts installed and rods finish machined on big and small ends in the USA

In addition, the LS Chevrolet set has these features:

- ARP 2000 Bolts are standard. They are rated at 215,000 to 220,000 psi tensile strength
- 1100 horsepower rated
- Lightweight construction, weight is 615 grams
- .025" longer center to center than stock rod
- No offset
